

MARCH 2023

gp COUNSELING CORNER

Standardized Testing

Standardized testing is currently taking place in the elementary, and is just around the corner for middle school and high school students.

Middle School Testing: week of 03/27-03/31

High School Testing: April 12

Seniors will be participating in job shadowing or community service while the underclassmen test on April 12.

Why Test?

Testing can ensure all educational stakeholders are held accountable. Standardized exams can show student improvement over time by taking the same tests over time. In addition, student test scores can also be easily compared to each other to show changes in progress.
